## Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

Group I: Claims 1-22, drawn to an apparatus for accessing and controlling of data in non volatile memory, class 711, subclass 103; accessing of data in dynamic random accessible memory classified in class 711, subclass 105.

Group II: Claims 23-32, drawn to a method of data being prefetched and being retrieved from a low level memory into a high level memory, classified in class 711, subclass 137.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as copying partial data into the non-volatile memory and dynamic random access memory from a mass memory. Likewise the invention I have a separate utility such as setting the operating parameters such as core voltage, frequency ranges of a particular device. Controlling access of a memory device (write protection etc.). Partitioning data in a memory into separate partitions such as temporal data area, permanent storage area. See MPEP 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for any one invention is not required for the other invention, restriction for examination purpose as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Application/Control Number: 10/817,448

Art Unit: 2188

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Duc T Doan whose telephone number is 571-272-4171. The examiner can normally be reached on weekdays from 8:00AM-5PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mano Padmanabhan can be reached on 571-272-4210. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
